SUMMARY

I build products end-to-end — from first research session to shipped feature — and I use AI tooling to do it faster than a traditional design cycle. Nine years across EdTech, HealthTech, and Enterprise SaaS. Most recently I solo-founded Aulys, an AI accessibility SaaS that generated 300+ VPAT reports and logged 1,000+ scan sessions from 30+ beta designers. The EU Accessibility Act became enforceable in 2025 — Aulys exists because compliance is now a product requirement, not an afterthought.

At Infosys / Imagine Learning I led design across 5 cross-functional teams, cut teacher assessment cycles by 70%, and built a 60-component design system so fast it earned a Certificate of Recognition from the SVP. At Simplifai I was the founding designer — built the practice from zero and drove a 73% jump in product adoption. My edge is product thinking at system scale.

FEATURED PROJECT

Aulys — AI Accessibility SaaS · Founder & Solo Builder

adityachinchakar.com/work/aulys

Figma Plugin + Web App · React 19, TypeScript, Next.js 14, Figma Plugin API · AI-assisted build

- Built solo from 0-to-1: research, design system, AI-assisted engineering, and go-to-market — full product lifecycle without a team.
- 300+ VPAT compliance reports generated and 1,000+ scan sessions logged — core proof the product delivers on its compliance promise.
- Scans full Figma frames (500+ layers) for WCAG 2.2 violations in under 10 seconds — simultaneous multi-frame scanning vs. the layer-by-layer approach of Stark, Able, and Axe.
- AI-reasoned fix suggestions, not just detection: identifies the violation, explains the WCAG criterion, and proposes a specific fix with reasoning.
- Ships Vision Simulator, WCAG version switching (2.1 AA / AAA, 2.2 AA / AAA), and downloadable VPAT reports — no competitor matches this feature set in one tool.
- Built to capitalise on the EU Accessibility Act (enforceable June 2025) — positions compliance as a designer workflow tool, not a developer audit.

EXPERIENCE

Senior Product Designer · Infosys · Imagine Learning

Aug 2024 – Present | Pune, India

Led design across 5 cross-functional product teams for a US-based EdTech client · 10,000+ teachers · 50,000+ students

- Cut teacher assessment time by 70% through a 5-tool AI Teacher Assistant Suite shipped from 0-to-1 — Rubric Generator, Recommendation Engine, Math Practice, Email Drafter, and PD Chatbot.
- Improved AI rubric acceptance from 41% to 74% through iterative research and interaction redesign — directly reduced manual correction burden on teaching staff.
- Built a 60+ component design system from scratch across 5 teams — zero component forks, one source of truth; earned a Certificate of Recognition from Jason Fournier, SVP at Imagine Learning.
- Compressed stakeholder review cycles from 3 weeks to 5 days via co-design sprints and an async feedback system adopted org-wide.
- Led 75+ educator discovery sessions; synthesised findings into a prioritised roadmap that shaped the AI suite's feature sequencing.
- Delivered 8 solo presales proof-of-concept designs — each a standalone design sprint compressed into days.

Product Designer · Simplifai Cognitive Services

Oct 2022 – Jul 2024 | Pune, India

Founding designer — built the entire design practice from zero · 12+ enterprise clients · 950+ users

- Drove a 73% increase in Flow Builder adoption through progressive-disclosure onboarding that reduced drop-off by 28% across 950+ users.
- Founded Simplifai's design practice as first designer: design system, research cadence, and dev-handoff process — 42% faster dev cycles, 60% less handoff friction.
- Defined interaction models for complex AI automation workflows; aligned product, engineering, and stakeholders on a fast-moving roadmap with no design precedent.

UI/UX & Motion Designer · Keywordio

Jan 2020 – Sep 2022 | Pune, India

Led a 5-person design team across product, motion, and visual design

- Redesigned 3 core CRM dashboards through research with 100+ users — cut data-access time by 12% and drove a 45% jump in team adoption.

- Led hiring, mentoring, and design quality for a team of 5 — set standards and review processes that scaled with the portfolio.
- Elevated product experience through motion design and visual storytelling, contributing to a 30% increase in user engagement.

Visual & Motion Designer · Green Earth Translogistics (Shell Petroleum) & Windows Film Production · 2017–2020

RECOGNITION

- **Certificate of Recognition** · Jason Fournier, SVP — Imagine Learning / Infosys · 2025 · Awarded for building a 60+ component design system from scratch in record time.
- 8 solo presales proof-of-concept deliveries · Infosys / Imagine Learning · 2024–2025

SKILLS & TOOLS

Product & Strategy 0-to-1 Incubation · Product Strategy · Roadmapping · User Research · Jobs-to-be-Done · A/B Testing · Metrics

Design Figma · Design Systems · AI UX Design · Interaction Design · Accessibility (WCAG 2.2) · Prototyping · Motion Design

Leadership Design Leadership · Team Management · Stakeholder Alignment · Design Operations · Cross-functional Delivery

Build (AI-assisted) React 19 · TypeScript · Next.js 14 · Figma Plugin API · Claude · v0 · Figma Make

EDUCATION & CERTIFICATIONS

B.E. Chemical Engineering · Shivaji University · 2017

Salesforce Certified AI Associate · Sep 2024

Infosys Certified Generative AI for All · Infosys Certified Google Generative AI Leader

Google UX Design Certificate · UXcel Accessibility Specialist
